

Title: Allocate New Halls in Hall Management System

As a hall administrator, I want to efficiently allocate newly constructed halls in the Hall Management System

Acceptance Criteria:

1. **Scenario:** Accessing the system.

Given: I am logged into the Hall Management System.

When: I navigate to the "Allocate New Halls" section.

Then: The system provides a user-friendly interface for managing the allocation of newly constructed halls.

2. **Scenario:** Adding new halls.

Given: I am on the "Allocate New Halls" page.

When: I choose to add a new hall to the system.

Then: The system prompts me to enter details about the new hall, such as hall name, location, capacity, and facilities.

3. **Scenario:** Configuring hall features.

Given: Details about the new hall are entered.

When: I have the option to configure hall features, such as room types, amenities, and accessibility features.

Then: The system allows me to customize the hall settings according to the specific requirements and preferences.

4. **Scenario:** Handling errors.

Given: Incorrect or incomplete information is entered during hall addition or room allocation.

When: I attempt to submit the form.

Then: The system provides clear error messages indicating the fields that need correction, allowing me to rectify the errors and proceed with the allocation process.

Success:

1. Given: I am on the "Allocate New Halls" page.

When: I choose to add a new hall to the system and enter all necessary details.

Then: The system successfully adds the new hall to the system database.

2. Given: Details about the new hall are entered.

When: I configure hall features according to specific requirements.

Then: The system allows me to customize the hall settings as desired.

Failure:

1. Given: I am logged into the Hall Management System.

When: I navigate to the "Allocate New Halls" section.

Then: The system fails to load the allocation page, displaying an error message or remaining unresponsive.

2. Given: I am on the "Allocate New Halls" page.

When: I attempt to add a new hall, but the system encounters an error during data entry.

Then: The system fails to add the new hall, displaying an error message indicating the issue.
